Oliver Long

Research experience

Government of Ireland Postdoctoral Fellow, University College Dublin — Sep 2026 –

Postdoctoral Researcher, Max Planck Institute for Gravitational Physics — Nov 2022 – Aug 2026

- Used numerical data to perform resummations of weak-field expressions for the radiated energy [1] and scattering angle [4] of a point-particle source, extending their validity into the strong-field regime.
- Extended the Spectral Einstein Code (`SpEC`) to be capable of producing the most accurate simulations of hyperbolic binary black hole encounters to date [9, 3], some of which have been made publically available [10]
- Produced the first numerical relativity simulations of highly asymmetric mass-ratio hyperbolic binary black hole encounters (mass ratio 1:10) and performed the first measurements of disparate scattering angles due to asymmetric gravitational wave emission [3].
- Used numerical relativity scattering simulations to extract high-order self-force coefficients and cross-validate post-Minkowskian calculations and effective-one-body models [2, 3].

Postdoctoral Research Fellow, University of Southampton — Jun 2022 – Oct 2022

- Used numerical data to extract high-order weak-field expansions of the scattering angle due to a point-particle source [5].

Ph.D. Student, University of Southampton — Sep 2018 – Apr 2022

- Developed and implemented a numerical method for calculating perturbations due to a point-particle source in black hole perturbation theory [15, 16].
- Performed the first-ever calculation of the post-geodesic correction to the scattering angle of a point-particle in a black hole spacetime [15].
- Derived analytic formulae for scattering geodesics in a black hole spacetime [16] and implemented them in the KerrGeodesics package of the Black Hole Perturbation Toolkit.

Education

Ph.D. in Mathematical Sciences, University of Southampton — Sep 2018 – Apr 2022

- Thesis title: Self-force in hyperbolic black hole encounters.
- Advisor: Prof. Leor Barack

MPhys in Physics, The University of Manchester — Sep 2014 – Jun 2018

- Project title: Constraints on the neutrino sector using current and future cosmological data.
- Advisor: Dr Eleonora Di Valentino

Fellowships and grants (total: ∼€1.02m)

Class B Allocation, Irish Centre for High-End Computing. **25k node-hours** — 2026

- Computing allocation for 48 `SpEC` simulations of unbound black hole encounters. Co-PI with Prof. Wardell.

Ambizione Grant, Swiss National Science Foundation. **CHF 632k** — 2026

- Funding for a four year tenure at Universität Zürich, Switzerland.

Government of Ireland Postdoctoral Fellowship, Research Ireland. **€135k** — 2026

- Funding for a two year tenure at University College Dublin, Ireland.

Junior Investigator Fellowship, Fundação para a Ciência e a Tecnologia. **∼€130k** — 2025

- Funding for a three year tenure at the Instituto Superior Técnico, Portugal.

Doctoral Prize Fellowship, Engineering and Physical Sciences Research Council. ∼**£40k** 2022

- Funding for a one year tenure at the University of Southampton, United Kingdom.

Oliver Long

Invited seminars (total: 4)

- CENTRA Seminar, Instituto Superior Técnico, "Black hole scattering with numerical methods and the resummation of weak-field analytic expressions", 30th April 2026.
- WQFT Seminar, Humboldt University of Berlin, "Black hole scattering in the strong-field regime: Merging post-Minkowskian theory with numerical methods", 25th November 2024.
- Gravity Seminar, University of Southampton, "Black hole scattering in the strong-field regime: Merging post-Minkowskian theory with numerical methods", 7th November 2024.
- Séminaire Amplitudes et Gravitation sur l'Yvette, Institut des Hautes Études Scientifiques, "Black hole scattering in the strong-field regime: Merging post-Minkowskian theory with numerical methods", 16th October 2024.

Invited talks (total: 12)

- Amplitudes, Strong-Field Gravity and Resummation, The Nordic Institute for Theoretical Physics, "Black hole scattering in the strong-field regime: Merging post-Minkowskian theory with numerical methods", 15th April 2026.
- Milestones in Amplitudes for Gravitational Waves and Cosmology, ETH Zürich, "Black hole scattering in the strong-field regime: Merging post-Minkowskian theory with numerical methods", 25th March 2026.
- Hyperboloidal Foliations and their Application, Erwin Schrödinger Institute, Universität Wien, "Hyping up self-force scattering: Methods and applications in the pre-hyperboloidal era", 13th January 2026.
- GWSky kick-off meeting, Max Planck Institute for Gravitational Physics, "NR, PM, PN, GSF comparisons and transferring information from one method to another", 9th December 2025 (joint with Raj Patil).
- 2nd Annual Workshop on Self-Force and Amplitudes, University of Southampton, "Applications of numerical self-force scattering simulations", 10th September 2025.
- EOB@Work25, Istituto Nazionale di Fisica Nucleare, "Highly accurate simulations of asymmetric black-hole scattering and cross validation of effective-one-body models", 4th September 2025.
- Mathematical Methods for the General Relativistic Two-body Problem, National University of Singapore, "Putting the hype in hyperbolic black hole scattering", 14th August 2025.
- Fundamental Physics Meets Waveforms With LISA, Max Planck Institute for Gravitational Physics, "Modelling of unbound binary black hole encounters", 6th September 2024.
- Gravitational Self-Force and Scattering Amplitudes Workshop, The Higgs Centre for Theoretical Physics, "Comparing numeric and analytic methods for black hole scattering in unequal mass systems", 20th March 2024.
- Gravitational Waves meet Amplitudes in the Southern Hemisphere, International Center for Theoretical Physics South American Institute for Fundamental Research, "Self-force meets post-Minkowskian in the scattering regime", 24th August 2023.
- Infinity on a Gridshell, Niels Bohr Institute, "Hyperbolic self-force calculations within a hyperboloidal framework", 10th July 2023.
- QCD meets Gravity 2022, Universität Zürich, "Extraction of high-order post-Minkowskian results from scattering self-force calculations", 13th December 2022.

Contributed talks (total: 15)

- 29th Capra Meeting on Radiation Reaction in General Relativity, Université Libre de Bruxelles, "Resummed radiative observables in eccentric and unbound extreme-mass-ratio systems using critical orbits", 2nd July 2026.
- New Frontiers of Numerical Relativity, Universitat de les Illes Balears, "Highly accurate simulations of asymmetric black-hole scattering and cross validation of effective-one-body models", 22nd July 2025.

- 24th International Conference on General Relativity and Gravitation and 16th Edoardo Amaldi Conference on Gravitational Waves, Glasgow, "Highly accurate simulations of asymmetric black-hole scattering and cross validation of effective-one-body models", 15th July 2025.
- "Hyperbolic Binary Black Hole encounters with the Spectral Einstein Code", NR Community Call, 2nd December 2024.
- Simulating Extreme Spacetimes with `SpEC` and `SpECTRE`, The Institute for Computational and Experimental Research in Mathematics, Brown University, "Hyperbolic Binary Black Hole encounters with `SpEC`", 7th August 2024.
- 27th Capra Meeting on Radiation Reaction in General Relativity, National University of Singapore, "Double the hype: Hyperboloidal framework for self-force in hyperbolic black hole encounters", 17th June 2024.
- 26th Capra Meeting on Radiation Reaction in General Relativity, Niels Bohr Institute, "Comparison of post-Minkowskian and self-force expansions: Scattering in a scalar charge toy model", 4th July 2023.
- LISA Symposium XIV, "Self-force in hyperbolic black hole encounters", 25th – 29th July 2022.
- 23rd International Conference on General Relativity and Gravitation, Chinese Academy of Science via Zoom, "Self-force in hyperbolic black hole encounters", 5th July 2022.
- 25th Capra Meeting on Radiation Reaction in General Relativity, University College Dublin, "Self-force in hyperbolic black hole encounters", 22nd June 2022.
- BritGrav22, University of Glasgow via Zoom, "Self-force in hyperbolic binary-black-hole encounters", 4th April 2022.
- 24th Capra Meeting on Radiation Reaction in General Relativity, Perimeter Institute via Zoom, "Time-domain metric reconstruction for hyperbolic scattering", 10th June 2021.
- BritGrav21, University College Dublin via Zoom, "Towards a self-force calculation of the scatter angle in hyperbolic encounters", 13th April 2021.
- LISA Symposium XIII, "Towards a self-force calculation of the scatter angle in hyperbolic encounters", 1st – 3rd October 2020.
- 23rd Capra Meeting on Radiation Reaction in General Relativity, University of Texas at Austin via Zoom, "Towards a self-force calculation of the scatter angle in hyperbolic encounters", 24th June 2020.

Posters (total: 1)

- 3rd meeting of the GWVerse COST action, Institute for Fundamental Physics of the Universe, International School for Advanced Studies, "Time-domain metric reconstruction using the Hertz potential", 13th – 16th January 2020.

Other events attended (total: 12)

- Precision Gravitational Wave Astronomy: From Theory to Discovery, Sexten Center for Astrophysics, 27th – 31st July 2026.
- In Pursuit of Gravitational Waves: Solving the Two-Body Problem in General Relativity, Max Planck Institute for Gravitational Physics (Albert Einstein Institute), 20th – 22nd October 2025.
- Black Hole Perturbation Toolkit Workshop (via Zoom), The Institute for Computational and Experimental Research in Mathematics, Brown University, 25th – 27th July 2022.
- From Scattering Amplitudes to Gravitational-Wave Predictions for Compact Binaries, Universität Zürich & ETH Zürich, 4th – 15th July 2022.
- Advances and Challenges in Computational Relativity Workshop (Online), The Institute for Computational and Experimental Research in Mathematics, Brown University, 14th – 18th September 2020.
- Black Hole Perturbation Toolkit Workshop (Online), Astronomical Institute of the Academy of Sciences of the Czech Republic, 25th – 27th May 2020.

- Kavli RISE Summer School on Gravitational Waves, University of Cambridge, 23rd – 27th September 2019.
- 22nd International Conference on General Relativity and Gravitation and 13th Edoardo Amaldi Conference on Gravitational Waves, Palau de congressos de Valencia, 8th – 12th July 2019.
- 22nd Capra Meeting on Radiation Reaction in General Relativity, Centro Brasileiro de Pesquisas Físicas, 17th – 21st June 2019.
- LISA Waveform Working Group Meeting, Max Planck Institute for Gravitational Physics (Albert Einstein Institute), 13th – 15th May 2019.
- BritGrav19, Durham University, 15th – 16th April 2019.
- Black Hole Perturbation Toolkit Workshop, University College Dublin, 19th – 21st March 2019.

Mentorship and supervision

Francesco Grippa — Nov 2025 –

- Visiting PhD student from Salerno University, co-supervised with Harald Pfeiffer.
- Project: Initial data for hyperbolic black hole encounters using the Extended Conformal Thin Sandwich (XCTS) approach.

Panels and discussions

- Panel member for "Connections to other approaches (EOB/NR/Amplitudes/PN) and Merger/Ringdown", 29th Capra Meeting on Radiation Reaction in General Relativity, Université Libre de Bruxelles, 3rd July 2026.
- Discussion chair for "Scattering – What? Why? How?", Fundamental Physics Meets Waveforms With LISA, Max Planck Institute for Gravitational Physics, 6th September 2024.
- Discussion chair for "Self-force meets Amplitudes", 26th Capra Meeting on Radiation Reaction in General Relativity, Niels Bohr Institute, 4th July 2023.

Research collaborations

Multiscale Self-Force (M2SF) Collaboration — Sep 2026 –

- Associate member

Simulating eXtreme Spacetimes (SXS) Collaboration — Nov 2022 –

- Contributor to the Spectral Einstein Code (`SpEC`) and the `scri` package.
- Member of the SXS Social Media Team.

The Black Hole Perturbation Toolkit — Mar 2019 –

- Contributor to the KerrGeodesics package.

Laser Interferometer Space Antenna (LISA) Consortium — Oct 2018 –

- Lead of the EMRI subproject of the Waveform Parameter Space for Astrophysical Sources project.
- Member of the Waveform Working Group and LISA Early Career Scientists (LECS).

LIGO Scientific Collaboration — Apr 2023 – Nov 2023

- Member of the Waveform Working Group.

Other community service

- Member of the Capra community's Equality, Diversity and Inclusion (EDI) Team. — Jun 2024 –
- Reviewer for *Physical Review Letters*, *Physical Review D*, and *SciPost Physics*. — Mar 2023 –

Computing experience

- Extensive experience with high-performance computing (HPC) on clusters.
- Extensive experience with running and troubleshooting binary black hole simulations with `SpEC`.
- Awarded 25,000 node-hours from ICHEC (Class B) for large-scale `SpEC` simulation campaigns.

Advanced: `C/C++`, `Python`, `Mathematica`, Git, Linux, MacOS, LaTeX.

Intermediate: Bash, OpenMP, Slurm, Paraview, Windows.

Some experience: `Perl`, `Cython`, OpenMPI.

Teaching experience

Postgraduate Student Demonstrator, University of Southampton Sep 2018 – Jan 2022

- Numerical Methods in Python: Run workshops based on problem sheets and coursework.
- Maths for Physicists: Run classes demonstrating mathematical techniques and coursework marking.
- Maths for Engineers: Run drop-in workshops, marking of exams, and exam writing.
